

Safety Tailgate Meeting | Week of October 29th, 2018

Project Name: _____

Job Number: _____

☐ Sheet Metal ☐ Piping ☐ Plumbing ☐ Start-Up

GF/Foremen: _____

Discussion Leader: _____

Date of Meeting: _____

Foot Protection

With all of the safety concerns in piping, plumbing, and sheet metal work, it's easy to forget about protecting your feet. Protective footwear worn in the workplace is designed to protect the foot from physical hazards such as stepping on sharp objects, heat and cold, wet and slippery surfaces, or exposure to corrosive chemicals.

Other foot hazards can include the following:

- ✓ Dropping tools, materials, or equipment on your feet.
- ✓ Setting down heavy objects on your feet
- ✓ Materials rolling on your feet

As it is in most cases, the best means of protection is to avoid these hazards and stay alert. Think ahead about what could happen.

- Avoid carrying objects which are too heavy for one person alone. Also, avoid carrying too many items which could cause you to drop them.
- When carrying or moving a piece of equipment, machinery, or other heavy object, think about where your feet are before setting it down. Communicate constantly with those helping you and keep your feet clear.
- Make sure materials are properly secured from falling off of a stack and onto your feet.
- When working around a vehicle, mobile scaffold, mobile lift, or anything else on wheels, be extra alert! Know where it is at all times, and work as far away from it as possible.
- *Always* wear protective footwear on the jobsite. Wear work boots that will protect you, not soft shoes that offer little to no protection.
- When working around heavy objects that could fall on your feet, wear guards over your work boots to prevent toe injuries.

Safety Comments/Suggestions for this Project: _____

PRE TASK PLAN

Project Name: _____

Job Number: _____

Sheet Metal Piping Plumbing Service

GF/Foreman: _____

Pre-Task Plan Prepared By: _____

Date: _____

Project Safety Contact: _____

Safety Contact Phone Number: _____

1. Required PPE	Hazards	Safe Plan of Action (SPA)
Hard hat Face shield Goggles Safety glasses Goggles	Material Handling	Inspected movement path Floor Plating (pinch / back) Awkward size/shape/CG Laydown area established Identified moving equipment Hand protection required Hand / body positions to avoid injury Spotter Debris Removal plan Wheels Chocked
Gloves: Leather Kevlar / Cut resistant Solvent Acid Arm sleeves Fire resistant		
Boots Steel - toe Toe covers Ear Plugs / Ear muffs Safety Vest Chemical Resistant suit / apron / tyvek suit Respirator Fire Resistant	Slips, Trips, Falls	Inspect for trip / slip hazards Tools & material properly stored Area clean / clear of debris Electrical / emergency equipment clear Hazards marked
2. Fall Protection Ladder inspection completed Retractable Device Required Inspected Fall Protection Equipment Shock Absorbing Lanyard Required Horizontal Lifeline System Required Anchorage Point Identified Fall Clearance Distance Adequate Fall Rescue / Retrieval Plan Set Up	Hand & Power Tools	Reviewed safety requirements GFCI in use Identified PPE required Routed cord overhead or taped / barricaded Guarding OK Inspected condition Inspected electrical cord
	Chemical Hazards	Area inspected for potential chemical hazard Identify PPE for highest recognized hazard (see left side) Reviewed Decon / Disposal or storage procedures Reviewed contingency plan and equipment is on hand MSDS Sheet available
	Non-Electrical Hot Work	Fire Extinguishers Combustible material removed / protected Fire watch Adequate ventilation Install weld / spark screens
	Crane or other Lifting Equipment	Lifting / Rigging equipment inspected Overhead utility clearance verified Tag lines in use Signalman assigned Areas barricaded
3. Task Specific Work Plans Lifting Plan (required for greater than 50 lbs.) Floor / Wall penetrations Lock Out / Tag Out Procedures	Barricades	Yellow (Caution) Barricade tape Rigid barricade required / secured to floor Barricade signage Travel paths barricaded / cones to protect foot traffic Red (Danger) Barricade tape (label barricade) Emergency egress clearly marked
	Weather	Review plans for weather including heat / wind / moisture Cool down periods Sun Screen Heat Stress symptoms Liquids available
4. Required Work Permits Hot Work (Non-Electrical) Confined Space Excavation Energized Electrical Work (EEW) Critical Lift (Crane) Scaffolds	Crew Congestion or Impact to occupants	Public Protection, Explain: Inspected areas for potential impacts to other crews / customers Coordinated with adjacent work supervisor / customer Traffic barricades
