Training

2020

Factory Certified Live Instructor eLearning

Sunbelt Controls has developed a first of its kind Factory Certified Training deployed remotely. We are proud to be a part of Automated Logic's BAS University Training program. Now you can have access to our training classes from the comfort of your home.

Courses conducted live in an instructor-led virtual Zoom classroom. Each student will be assigned individual workstations with physical hardware that they can access remotely through our secure Screen Connect website. The instructor will lecture, demonstrate tasks and assist with completion of workbook assignments. At the end of the course, students will log onto the ALC's Learning Management System (LMS) to take an online exam. Once the exam has been passed each student will be able to download his or her certificate.

Note: The factory offers 1 College Education Unit (CEU) per hour in the virtual classroom. Students will receive 1.6 CEUs for passing a 2 day course and 2.4 CEUs for passing a 3 day course.

Our list of remote classes included:

- WebCTRL Basic (WC-207)
- WebCTRL Intermediate (WC-307)
- Eikon Intermediate Programming (EIK-307)
- ViewBuilder Basic (VB-207)
- Field Tech for Owner / Operators (FTO-207)
- Networking Intermediate (NET-307)
